

Grading Rubric for Research Paper

1. No title (-5%) -- Lose 5% for not having a title. Title should be specific for your paper. Generic titles such as “Cap and Trade Research Paper” are not acceptable.
2. Bibliography (10%) -- Get 10% for including a bibliography (or list of references) that contains sufficient information for reader to find the reference material. There must be at least 4 different references in your bibliography. We will not be looking for a specific format or style, only that it contains the correct information about source material.
3. In-text citations (10%) – Get 10% for including four in-text citations to items in your bibliography. No specific format is required for your in-text citations. However, it must be clear as to which source (or bibliography entry) that the information was taken.
4. Plagiarism. Missing citations to reference material where required will be dealt with severely. Up to 20% will be deducted for minor infractions, such as failing to provide citations to a reference source that is listed in the bibliography. For severe cases of plagiarism, such as including material from sources that are not listed in your bibliography or extended word-for-word copying without quotation marks, no credit will be awarded for the paper. For especially severe cases, such as copying another paper, the instructor may consult with the Dean of Students for disciplinary actions.

The remainder of the grade is based on the paper content and writing. A grade will be awarded for each of the three sections of the paper.

5. Introduction (20%) – Look for content listed below as well as writing, which includes organization, clarity, use of words, grammar, and spelling
 - a. Background. At a minimum should include that CO₂ is increasing due to human activity, many are concerned this will lead to harmful climate changes, thus several countries have enacted or are considering legislation to reduce emissions of CO₂. For some topics more background information will be necessary.
 - b. Introduce your topic into the background discussion. Let the reader know what you are going to discuss (or debate) in the body of the paper.
6. Body (40%) – Look for content listed below as well as writing, which includes organization, clarity, use of words, grammar, and spelling
 - a. Topic must be an acceptable, debatable issue for the paper
 - b. Arguments on both sides of a single, focused issue should be presented. Points will be deducted for straying into multiple issues or topics.
 - c. Must show sufficient research on both sides by using in-text citations. If there is no evidence of outside research, you may lose all credit for the body section. You are required to have at least two different in-line (or in-text) citations for each side of your debatable topic or question (4 total).

- i. There can be citations to the ideas of others, which support one side of the debate or issue;
 - ii. There can be citations to data or information that support arguments on one side of the debate or issue;
 - iii. The use of long, direct quotations is discouraged, especially if the information can be easily presented in your own words. Points will be deducted for unnecessarily long direct quotations.
 - d. Relative length of body section. The body section of the paper should be longer than the introduction and conclusion sections.
7. Conclusion (20%) – Look for content listed below as well as writing, which includes organization, clarity, use of words, grammar, and spelling
- a. Brief summary of the background issue and debatable topic
 - b. Opinion clearly expressed with respect to the debatable issue or topic. You are not expected to present a persuasive argument or detailed explanation for your opinion, but you should briefly discuss the main reason for your opinion on the issue. Use of the word “I” is appropriate when stating your opinions and beliefs.
